CISD and Achieve are enhancing the process in which data is imported into Data Director. In the past Achieve updated Data Director directly from Zangle with queries we provided. In the next month or so, we will be changing this process to ensure more timely and accurate data in Data Director. The CISD is developing a process that entails exporting zangle data into an intermediate “holding tank” that will then be transferred nightly to Data Director. This enhanced process will allow us to better manage the queries being used to export data from Zangle, grant us the ability to identify data integrity issues without intervention from Achieve and if a problem does arise it will simplify the process of determining where the problem occurred. As now, you will not notice this process occurring.
