

# Continuum of Collaboration

- *No Conversation* – No conversation
- *Consultation* – Voluntary process in which one professional assist another to address a problem concerning a third party
- *Collaborative Consultation* – Ongoing two-way interaction between two or more professionals involving shared decision making as they work toward a common goal
- *Cooperative Teaching* - Both the general and special educators are present in the general classroom with joint responsibility for instruction
- *“Team” Teaching* – considered one of the approaches in co-teaching but epitomizes optimum collaboration – both teachers actively involved in planning and instructing all students together – truly “We”
